PREFACE

This catalogue primarily covers cars made in France, although the majority of the parts are used in British built cars. For the principal parts special to British production see end of book.

The present catalogue contains illustrations and names of the chassis and body parts of the 1957 Model "ID 19".

a) **Arrangement.** The binding is of a type which allows easy replacement of the pages when any considerable changes are made.

b) **Classification and names.** The parts are classified by units or groups. They are grouped, in the illustration, in the order in which they are assembled; in the text, on the opposite page, they are arranged in numerical order.

Finding a part number is thus made easy and rapid; when the length of the text requires the use of several pages, the illustration is repeated as often as needed.

We have added to the description of certain parts, dimensions and particulars which assist in quicker identification. These dimensions are given for identification only, and are subject to modification as may become necessary.

The numbers of each part used in a unit or sub-assembly is shown in the "Number off" column.

c) **Reading the Catalogue.** Consult the table of contents (pp.VI to IX) which refers to the text and illustration. Look for the part in the illustration on which the number is shown, look up this number on the text page and read the description there; should a part have several numbers on the illustration, look up these numbers on the text page to ensure successful identification.

With certain units and assemblies, different types of assembly have been dealt with in more than one chapter at the head of which the dates for the differing assemblies are given.

For parts not illustrated, and where there can be no difficulty in identifying them, look for the name and number directly in the text.

If it should happen that in some rare case you are not certain of being able to

write out the order correctly, it is advisable to give us the chassis and engine numbers and the type of body.

The classification of the "Spare Parts" Department into Sections I, II, III and IV no longer applies to parts with numbers beginning with D, DM, and DS; the classification "Section VI", however, still applies.

The parts in Section VI with D in the number, or with the old numbering, are incorporated, according to their purpose, in the chapters of the present catalogue but with the mention (Section VI) after the description.

d) Placing orders (*For Overseas Agents only*)

1. Parts with numbers in the D series: Make out a separate order for -

Parts in Section VI.

Complete units, body, cylinder blocks or crankcases.

All other parts together in full numerical order.

Do the same for parts belonging to the DM and DS series.

2. Parts with numbers belonging to the "General series": Make out a special order for each section (Section I), (Section II), (Section III), (Section IV) and (Section VI).

The orders for the "General series" made out in this way apply to parts for all vehicles indiscriminately.

Special order forms are available on direct application to:-

Societe Anonyme Andre Citroen,
23 Rue Ernest-Cognacq,
Levallois-Perret (Seine) France.

e) **Prices and conditions of sale.** Prices are given in a separate list; they are subject to alteration without notice.

The conditions of sale are shown at the head of our price-lists (spare parts, re-conditioned units and standard exchanges).

NUMBERING OF PARTS

The new system of spare parts numbering which we adopted several years ago is that used for the ID 19 Model, and each division of the catalogue begins with these parts. After them come parts common to this model and to others, these parts retaining their style of numbering.

METHOD

The number is composed of :

a) One or more capital letters indicating the type of car.

b) Two numbers of one to three figures separated by a hyphen.

Example: DM331-1 Gearbox and clutch casing, only for ID 19 model.

The last figure may be followed by a small letter used to indicate a part which is the same (as regards its purpose) but not interchangeable because :

it is asymmetrical (right or left-hand part)
the dimensions are different.

COMPOSITION OF NUMBERS

The car is divided into nine main sections (units or unit assemblies serving the same purpose) designated by the first figure of the first number, namely :

1. Engine proper.
2. Engine (accessories connected with its purpose).
3. Transmission (clutch, gearbox, drive shafts and joints).
4. Connection with the ground (front and rear axles, brakes, steering).
5. Electrical, visibility, signalling.
6. Safety, comfort, tools.
7. Chassis, platform, hull.
8. Body, fittings.
9. Upholstery, trimming.

These nine main sections are themselves divided into different groups represented by the second figure in the first number.

These groups, in turn, are divided into sub-groups indicated by the third figure in the first number.

Example: DM 331-0. Gearbox lid assembled with selector forks and rods, only for ID 19.

CLASSIFICATION OF PARTS IN THE CATALOGUE

In all our printed matter we have adopted the following classification in principle :

1. Numerical, in conjunction with two numbers but governed by the first.
2. Alphabetical for the index letters (as prefix or suffix).

For concrete examples, see Index (pp. X to XXVI).

CATALOGUE IN NUMERICAL ORDER

The parts to which this new system of numbering is applied are not included in our "Catalogue in numerical order".

To make it more easy to find a part whose number you know, we have compiled an index (pp. X to XXVI) in this catalogue which shows you the page on which the part concerned appears.

RECOMMENDATION

You should take great care to note exactly :

The letters (capitals as prefix, small letters as suffix);
The hyphens separating the two numbers.

The omission of one of these items when composing a number completely alters the meaning and you would thus risk making an error in writing out the number of a part and of being sent a part *entirely* different from the one wanted.

DM 454-06	Lever for hand brake, complete with release handle.	1	DM 454-54	Clevis pin for hand brake release handle, 4 dia. 23 long.	1	DM 454-119	Clevis pin for locking hand brake, 6 dia. 38.5 long.	1
DM 454-1a	Cable for mechanical brake, 910 mm long (R.VI).	1	DM 454-55	Distance piece, 9 i/d 13 o/d 34 long, securing hand brake (R.VI).	1	2.271-S	Nut, hex., 4 dia. 75 pitch, for screw adjusting hand brake release rod (R.III).	1
DM 454-3	Lever for hand brake.	1	DM 454-57	Clevis pin for brake cable rod, 7 dia. 26.2 long.	1	2.368-S	Nut, hex., castellated, 9 dia. 125 pitch, for securing hand brake lever (R.III).	1
D 454-16a	Cable for connecting hand brake, 620 mm long (R.VI).	1	DM 454-67	Screw, round head, 4 dia. 16 long, for adjusting hand brake release rod.	1	2.491-S	Nut, hex., 7 dia. 100 pitch (R.III): - for securing hand brake bracket - for connecting cable for brake.	3
DM 454-24	Bracket for thrust block for hand brake sheath and ratchet.	1	D 454-76	End sleeve for hand brake connecting cable, inner dia. 8.5 mm, 18 mm long (R.VI).	2	2.741-S	- for securing hand brake bracket - for connecting cable for brake.	2
DM 454-27	Release handle for hand brake.	1		Grommet for protecting brake cable (R.VI).	1	3.008	Screw, round head, Parker, 4.85 dia. 9.5 long, for securing hand brake protection grommet (R.VI).	2
DM 454-28	Spring for hand brake locking piece, outer dia. 8 mm.	1	DS 454-95	Release rod for hand brake.	1	614.201	Washer, 6.25 i/d 12.1 o/d, for hand brake locking pin (R.II).	1
DM 454-29	Locking piece for hand brake.	1	DM 454-103	Retaining spring for hand brake ratchet, inner dia. 7.3 mm.	2	621.057	Nut, hex., 16 dia. 150 pitch, for locking adjustable thrust block (R.II).	1
DM 454-30	Ratchet for locking hand brake 10 mm dia.	1	DM 454-109	Clevis pin for retaining: - hand brake ratchet, 7 dia. 24 long - brake cable.	1		Screw, 9 dia. 50 long, for securing hand brake lever (R.II).	1
DS 454-32	Thrust block, adjustable, for hand brake cable sheath, thread 16 dia. 150 pitch 50 long.	1	DM 454-115		1			
DM 454-52	Half rod for brake cable, 97 mm long.	2			1

DM 314-2a	Cable for clutch, 495 mm long (R.VI).	1	DM 453-73	Rod for master cylinder plunger, thread 9 dia. 125 pitch 131 long.	1	2.493-S	Nut, hex., 7 dia. 100 pitch, for locking adjusting nut for clutch fork (R.III).	1
DM 314-3	Pedal for clutch.	1	DM 453-96	Clevis pin, 8 mm dia., for master cylinder plunger.	1	89.744	Washer, 18.5 i/d 30 o/d 2 thick, between pedal return springs.	1
D 314-17	Nut, hex., 7 dia. 100 pitch, for adjusting clutch fork.	1	DM 453-97	Pedal pad, rubber	2	543.322	Bush, 18 i/d 22 o/d 17 long, for pedal bracket (R.VI).	1
DM 314-21	Push rod, adjustable, for clutch, thread 7 dia. 100 pitch 136 long.	1	DM 453-191	Bracket for master cylinder.	1	543.326	Bush, 18 i/d 22 o/d 29.5 long, for pedal bracket (R.VI).	1
DM 314-33	Lever controlling adjustable clutch push rod, 72.5 and 42.5 mm between centres.	1	DM 453-192	Fork end for master cylinder plunger, thread 9 dia. 125 pitch 43 long.	1	543.331	Spring for brake pedal, inner dia. 21 mm, 66 mm long, 3.2 mm wire, 9 R.H. turns (R.II).	1
DM 314-34	Shaft for pedals and clutch control lever.	1	484-S	Screw, hex. head, 7 dia. 17.5 long, for securing master cylinder bracket on pedal bracket (R.III).	4	543.332	Spring for clutch pedal, inner dia. 21 mm, 66 mm long, 3.2 mm wire, 9 L.H. turns (R.II).	1
DM 314-86	Sleeve, rubber, for sealing pedals, inner dia. 24 mm.	1	485-S	Screw, hex. head, 7 dia. 20 long, for securing control lever for adjustable clutch push rod (R.III).	1	543.335	Cotter, thread 7 dia. 100 pitch, 44 mm long, for clutch pedal (R.II).	1
DM 314-88	Thrust washer, 7.2 i/d 22 o/d 2 thick, for control lever for clutch push rod.	1	2.372-S	Nut, hex., 9 dia. 125 pitch, for locking master cylinder plunger rod (R.III).	1	543.391	Grub screw, 7 dia. 25 long, for pedal stop adjustment (R.II).	2
DM 314-95	Bush for control lever for clutch push rod, 7.2 i/d 18 o/d 5.7 wide (R.VI).	1	2.490-S	Nut, hex., 7 dia. 100 pitch, for pedal stop adjusting screw (R.III).	2	615.022	Nut, hex., 18 dia. 150 pitch, for clutch cable adjustment (R.VI).	2
DM 453-0	Pedal gear assembly, complete, with stop lamp switch.	1	2.491-S	Nut, hex., 7 dia. 100 pitch (R.III): — for clutch pedal cotter — for securing master cylinder to bracket — for securing master cylinder bracket to pedal board.	1			
DM 453-03	Master cylinder, complete.	1			1			
DM 453-1	Pedal for brake.	1			2			
DM 453-3	Bracket for brake and clutch pedals.	1						

90 – PIPING FOR SUSPENSION

NUMBER	DESCRIPTION	No. OFF	NUMBER	DESCRIPTION	No. OFF	NUMBER	DESCRIPTION	No. OFF
DM 391–25	Piping, flexible, for suspension overflow return (R.VI).	1	D 391–127	Sleeve, rubber, for protecting flexible tube connecting pressure regulator to 4-way union.	1	DM 435–29	Tube for return from rear corrector (front part).	1
DM 391–84	Tube for connection, complete with unions between pump and pressure regulator.	1	D 391–128	Sleeve, rubber, L.H., protecting overflow return pipe of rear suspension cylinder, 320 mm long.	1	DM 435–30	Tube feeding L.H. front suspension unit.	1
D 391–100	Tube, rubber, connecting pressure regulator to 4-way union, 14 mm dia. 500 mm long.	1	D 391–129	Sleeve, rubber, R.H., protecting overflow return pipe of rear suspension cylinder, 390 mm long.	1	DM 435–32	Piping assembly, general, for suspension (rear part).	1
DM 391–102	Tube for connecting pressure regulator to distribution unit (pressure regulator side).	1	DS 391–136	Sleeve, rubber, for branch pipe on reservoir, for overflow return from correctors 18 dia. 42 long.	1	DM 435–33	Closing plug, for L.H. side cross member, 60 x 40 x 35 (R.VI).	2
DM 391–104	Sleeve, rubber, for branch pipe on overflow return corrector, 2 i/d 29 long.	2	DS 391–140	Collar, rubber, for height corrector overflow return, 46 mm long.	7	DM 435–34	Closing plug, for R.H. side cross member, 60 x 50 x 40 (R.VI).	1
D 391–105	Bush, flexible, under tightening clip, internal dia. 15 mm (R.VI): – for tube connecting pressure regulator to 4-way union and reservoir – for flexible union for overflow return.	4	DS 391–141	Collar, rubber, for height corrector overflow return, 77 mm long.	4	DM 435–57	Clip, double, for securing pressure regulator pipe and corrector pipe.	1
D 391–108	Bush, flexible, under tightening clip, internal dia. 19 mm (R.VI): – for tube connecting pump to reservoir – for rubber union for overflow return.	2	DS 391–144	Tube, Rilsan, for front corrector overflow return, 1.200 mm long (R.VI).	1	DM 435–61	Support for suspension piping (1 hole, 5.5 mm).	3
D 391–109	Sleeve, rubber, for protecting pipe on suspension cylinder support, 48 mm long (R.VI).	2	DS 391–145	Tube, Rilsan, for rear corrector overflow return, 4.200 mm long (R.VI).	1	DM 435–125	Tube for connecting L.H. rear suspension (1 3-way union).	1
DM 391–112	Union, rubber, for suspension overflow return, inner dia. 7 and 11 mm, 880 mm long.	2	D 393–73	Sleeve, rubber, for union on pipe between pump and pressure regulator, inner dia. 8.5 mm, 12.5 long.	2	DM 435–130	Pipe connecting general piping assembly to R.H. rear suspension cylinder.	1
D 391–113	Bush, split, rubber, for securing overflow return pipe.	11	D 393–87	Distance piece, 5.5 i/d 16 o/d 4 thick for suspension 4-way union.	1	DM 435–135	Tube for return from front corrector.	1
DM 391–122	Tube, rubber, 7 i/d 14 o/d 1.280 mm long, between 4-way union and reservoir.	1	DM 435–21	Tube feeding L.H. and R.H. front suspension.	1	DM 435–146	Tube for feeding R.H. front suspension.	1
DM 391–126	Tube, rubber, 11 i/d 18 o/d 825 mm long, between pump and reservoir.	1	DM 435–25	Tube connecting pressure regulator to distribution unit (distribution unit side).	1	D 435–150	Sleeve, rubber, protecting suspension feed tube.	4
			DM 435–27	Union, 4-way, for suspension.	1	D 435–165	Sleeve, rubber, protecting suspension piping, 147 mm long.	2
			DM 435–28	Tube feeding front corrector,	1	D 453–82	Sleeve, rubber, for union, 4.5 i/d 6.5 o/d 11 long.	as nec.
					1	DM 453–82	Sleeve, 14 dia. 19 long, protecting suspension piping (R.VI).	5

CORRECTIVE No. 209. Dated 15th December 1959
CATALOGUE ID 19 - No. 470.
(December 1958 Edition)

In the case of the "NEW PARTS" to be added to the catalogue, we have printed the text on one side of the sheet only so that the individual items may be cut out and glued in position on the appropriate pages.

In the case of the "MISCELLANEOUS CORRECTIONS" these relate to items which must be corrected by hand in the original catalogue. They have therefore been printed on both sides of the sheet.
