Legend *How to read the fiche?*

A fiche set consists of several fiche sheets, each depicting a large number (200 or more) of individual fiche pages. Each page has its own *drawing number*, referenced from the cross reference charts in the Appendix.

The left column shows the components with reference numbers while the right column gives model information and the actual descriptions and Citroën part numbers for all referenced, individual parts.

Legend ORGA Numbers

The organization number shows the day when your car was actually assembled on the production line. The dealers and parts stores use this number (sometimes also called RP or Replacement Parts number) to identify the various parts and components fitted to your car.

On your car, the ORGA number can be found stamped on the left hand front door A-pillar, above the courtesy light switch.

Calculating the production date is very easy using the following table. Locate the largest number in the table still less than or equal to your organization number.

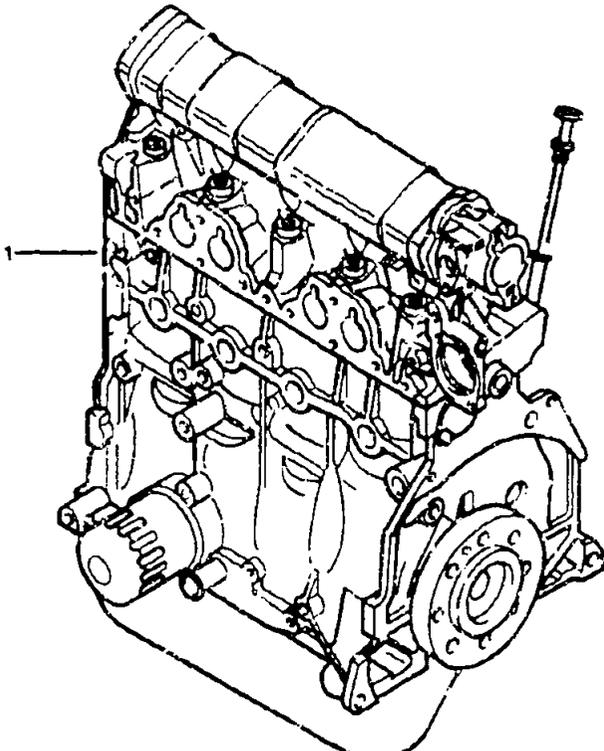

To see an example, let's assume the number is **4859**. Then the largest number

will be **4832** in the cell **February 1990**. Just subtract this number from your organization number to get the day of the month of the production of your car (in our example, $4859 - 4832 = 27$ yields **February 27, 1990**).

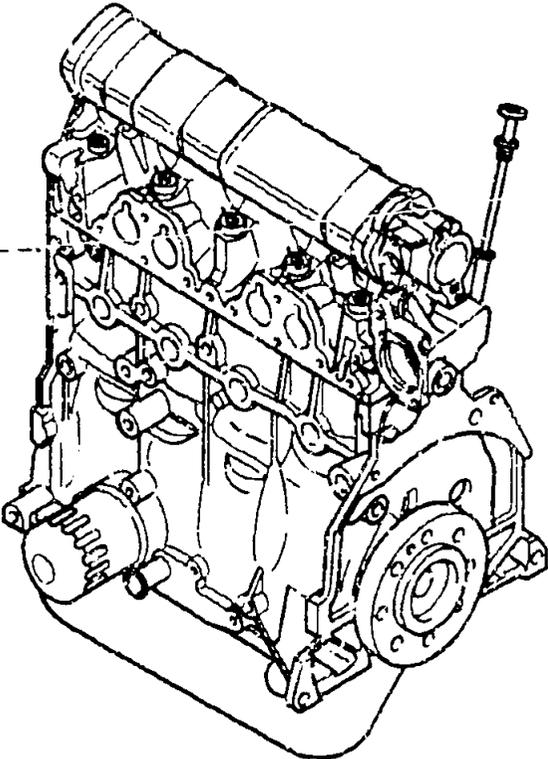

If you receive the non-existent date zero (this happens when your organization number is not greater than but equal to the number in the table), simply take the last day of the previous month. For instance, for the organization number **5013** the largest number in the table is **5013** in the cell **August 1990**, subtraction results in **zero**, hence the production date is **July 31, 1990**.

The diagram shows an exploded view of a crankshaft pulley assembly. The main assembly is shown in a perspective view, with various components labeled with numbers 1 through 35. A detailed view of the pulley wheel is shown at the bottom left, with labels 12, 30, and 32. A detailed view of the flywheel screw and self-tap screws is shown at the top left, with labels 13, 32, 14, 30, 31, 33, 34, and 35. The parts list table on the right provides the part numbers and descriptions for each component.

The diagram shows an exploded view of a camshaft gear assembly. At the top, there is a row of small images for parts 33 through 40. The main diagram shows the camshaft gear (2) with various components like the stop-ring (38), pin (39), and cap screws (33, 34, 35, 36, 37, 40) being assembled onto it. The camshaft (1) is shown below, with various components like the wedge (37) and cap screws (33, 34, 35, 36, 37, 40) being assembled onto it. The diagram is labeled with '12/94' and 'P1230400'.

The diagram shows an exploded view of a gearbox housing assembly. The main housing is shown in the center, with various components like the top cover, bottom cover, and internal parts. Callouts 1 through 34 point to specific parts. A parts list table is located to the right of the diagram, providing part numbers and descriptions for items 30 through 34. The diagram also includes a date stamp [12/84] and a part number P3311500.

<p>The diagram shows an exploded view of the kickdown cable assembly. At the top, a row of parts is numbered 30 through 39. Below this, the main assembly is shown with various components labeled with numbers 1 through 42. A cable (25) runs through the assembly. A parts list table is located on the right side of the diagram area, listing part numbers, descriptions, and quantities. At the bottom left, there is a small table with three numbered boxes (40, 41, 42) containing specific detail drawings of parts.</p>

The diagram shows an exploded view of the kickdown cable assembly. At the top, a row of parts is shown with callouts 30 through 39. The main assembly includes a cable (25) connected to a lever mechanism (21-24) and a release spring (42). A detailed inset shows the cable's connection to the gearbox housing. A small table at the bottom left shows parts 40, 41, and 42. The diagram is labeled '12/94' and 'P3357020'.

The diagram illustrates the assembly of the intake manifold distributor. Key components include the main distributor body (1), carburetor (2), fuel feed pipe (13), and various fasteners. The exploded view shows the relationship between the manifold (1), carburetor (2), and the fuel feed pipe (13) with its associated fittings (24, 25, 26). The carburetor (2) is shown with its internal components and the distributor body (1) with its valve train. The fuel feed pipe (13) is connected to the manifold (1) via a fitting (24) and a vacuum union (25). The fuel feed pipe (13) is also connected to the carburetor (2) via a fitting (26). The fuel feed pipe (13) is secured with a clamp (11) and a spring washer (12). The fuel feed pipe (13) is also connected to the manifold (1) via a fitting (24) and a vacuum union (25). The fuel feed pipe (13) is secured with a clamp (11) and a spring washer (12). The fuel feed pipe (13) is also connected to the manifold (1) via a fitting (24) and a vacuum union (25). The fuel feed pipe (13) is secured with a clamp (11) and a spring washer (12).

Diagram showing the assembly of a driveshaft. The main shaft is labeled 1. Sub-assemblies are indicated by brackets: 4 (A+B+C+9+11+16) and 5 (C+D+11+16). Individual parts are numbered 1 through 16. A small inset shows parts 30 (a screw), 31 (a bush), and 32 (a snap ring). The diagram also shows the shaft being inserted into a housing (NFP) and secured with a snap ring (32).
